

Debate 3 - Business

Artificial Intelligence Policy

Prof. Jack Reilly

S2026

Resolution

The current AI buildout is a substantial economic bubble, the correction of which will cause widespread economic harm.

Affirm	Negate	Jury
Team 3	Team 1	Team 2

Amendments and Adjustments

- See [debate guidelines](#) and [debate tips](#) for guidance and details.
- The standard class debate format for this debate has been modified in the following ways:
 1. **Constructive** (4 min per team)
 - 1 min prep
 2. **Cross-Examination** (8 min total, back and forth)
 - 2 min prep
 3. **Rebuttal** (2.5 min per team)
 - 1 min prep
 4. **Final Focus** (1 min per team)

Judge's Notes

- Like Debate #2, this debate may require some additional external research.
- While not the *immediate* resolution, a clear subtext to this debate is “*Is AI moving too fast? Is it getting too big too fast? Is the expected value of AI too negative, given foreseeable costs and benefits? Do the pitfalls and perils outweigh the promise?*”. While debates are always won and lost by debating the actual resolution, it can be beneficial in prep to consider this broader question, along with the implications that question has for policy that we may or may not wish to pursue.
